I spoke to Andrew today. I had told him that I would call before I sent the report. He seemed to understand all of the requirements. He thanked me for my help. I'm cautiously optimistic that he will follow through.

Thanks. I was unable to locate MSDS for the Barsol compound you mentioned, and have sent an informal request directly to Barton Solvents.

Kurt,

I tried to send this as one doc but it was too big, so attached is my report of investigation in two parts. I issued a Letter of Non-Compliance for wastewater and storm water permits. Our Water Supply Section sent them a letter on May 30 requiring them to apply for a water supply permit. I also notified them that they cannot allow discharges to the ditch. Let me know if you have any questions or concerns.
